Products from the present invention are used in assays of galacia by ideal and receptor binding and the development of drugs acting on galania hading, such as memory function improvers, appetite improvers, and function requiators for the womb, kidney, prostate, testis or skeletal muscle. Yallya to yasia and resistent process and function in the companion of
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        Sequence
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               Galanin receptor: stomach ulcer: antiulcer: diabetes; antidiabetic:

CHO cells. This protein is particularly used to identify agonists or antagonists which can be used to treat e.g. ulcers, diabetes or dementia, etc. The protein can also be used for the detection of galanin, in the production of antibodies, and transgenic animals.
